\$85,664.00  
\$86,336.25

**Recommended Quote or Bid:**  
Park Construction

\$73,746.20

## General Information:

In order to preserve the lifespan and aesthetics of the street pavements, utility excavations occurring within 5-years of a street reconstruction project are required to replace the pavement from the curb line to curb line and from saw cut line to saw cut line. This is approximately a 30-ft by 30-ft patch. This requirement is applicable to utility excavations of both internal staff as well as private utility companies.

Since 2013, there have been 21 public watermain repairs on streets reconstructed within the past 5-years. Staff recently solicited quotations for these repairs. 3 quotes were submitted with Park Construction being the low. Park Construction is currently working on Olinger Boulevard Project and is familiar with our construction requirements. Funding for this project is from the water utility fund.

Staff recommends awarding the project to Park Construction, Inc.
